List of Phase Changes Between States of Matter - ThoughtCo Phase changes typically occur when the temperature or pressure of a system is altered. When temperature or pressure increases, molecules interact more with each other. When pressure increases or temperature decreases, it's easier for atoms and molecules to settle into a more rigid structure.

3.4 Solving Energy Problems Involving Phase Changes and ... But the phase changes of water represent another way to change the energy of a system that contains the phase-shifter water. So often we need to consider both temperature change and phase change when we are trying to figure out what happens with heating or cooling. Phase change - definition of phase change by The Free ...
